ECO Green Equipment Announces New Manufacturing Facility in North Salt Lake, Utah USA.

Expanded manufacturing operations in USA provides latest technology in tire and rubber recycling equipment.

NORTH SALT LAKE, UT. June 22, 2015 — ECO Green Equipment, an international leader in the design and manufacturing of turnkey, cost-effective tire recycling systems, announced today the recent expansion of a new manufacturing facility in North Salt Lake, Utah, USA. This location will feature all design, assembly, and testing of ECO Green Equipment's full line of tire recycling equipment.

The location will include a full lab and showroom for research, innovation, and demonstrations of tire recycling equipment.

"We are looking forward to growing our tire recycling equipment operations here in North Salt Lake," said Mr. Brad Swenson, President of ECO Green Equipment. "ECO Green Equipment prides itself in being the leading innovator in the manufacturing of tire recycling equipment. Our innovative engineering and designs are changing the industry standard. This new facility will provide the best craftsmanship and excellent customer service, globally."

Most recently, ECO Green has completed the fabrication and testing of their new ECO "Green Giant" two-shaft shredder...capable of processing up to 30 tons/hour of rough tire shreds. Equipped with a patent pending easy access cutting chamber...the

customer can access the entire chamber for maintenance in minutes. The shredder also features a patent pending interchangeable cutting knives which can be rotated quickly for new cutting edges...up to 6 edges per blade and the ability to re-sharpen up to 1-2 times...saving on overall wear costs and downtime.

The ECO Green Equipment team welcomes visiting parties to see their full line of equipment by appointment. Call +1 (801) 505-6841 to arrange a visit and see the latest in tire recycling equipment technology.
