ECO Green Equipment Announces New Tire Derived Shred System Installed for Grupo Eco Rubber S.A., Organization in Costa Rica.

New system provides latest technology in tire and rubber recycling for region

SALT LAKE CITY, UT. May 19, 2017 — ECO Green Equipment, an international leader in the design and manufacturing of turnkey, cost-effective tire recycling systems, announced today the completion of a new ECO TDS (Tire Derived Shred) tire recycling system installed in the city of, San Jose, Costa Rica, for the Grupo Eco Rubber S.A. Organization.

This new Eco Green Equipment system will be the first commercial tire shredding operation in Costa Rica and will provide the latest tire recycling technology for the country.

“We are very impressed with the equipment and service received from ECO Green,” said Humberto Bogantes, Owner of Grupo Eco Rubber. “Their technicians are always available when needed!”

The system will feature the patented ECO Green Giant tire shredder and separation technology exclusive to ECO Green Equipment. Grupo Eco Rubber has made breakthroughs in developing the markets in a country where tire recycling has not been available.

“They are pioneers in their country!” said Brad Swenson, President of ECO Green Equipment. “They have the most advanced tire recycling equipment equipment in the industry and that will give them the ability to succeed!”
