## Specifications

Up to 63" rim  
Large steel bead separated from the tire  
Up to 10 tires per hour  
125 HP  
18,000 lbs  
LxWxH (22 x8 x8)

## Description

The Eco Extractor 63 is designed to remove steel beads from the largest mining tires on earth. Its unique proprietary design gives it the ability to extract clean beads from these nearly indestructable 63" rim tires. Its unique features such as the reverse hook design and single person remote control operation make it the fastest and most cost effective way to remove mining tire beads in the world. Additionally, once the bead has been removed it makes further down stream processing economical and financially feasible.
