**The new ECO Green Monster Single-Shaft Shredder is the perfect primary shredder for downsizing large tires such as OTR, Super Singles, and agricultural tires.**

The power of our hydraulic drive system will produce properly sized shreds for your market. It's the perfect solution for multiple waste reduction applications. Operate as a single machine or combine with an integrated ECO Green Waste Reduction Module.

ECO Green offers five integrated tire recycling Module Systems to fit your production setup.

Call us direct with your specifications. We offer the best return on investment and environment anywhere.
